Using the arrows it is possible to navigate between the matches.

This is the best way, in fact opening too many tabs at the same time will be perceived as an abuse and the user will be locked out.

If you come from the list of Favorites, navigation using arrows will only be done between the favorite matches.

First of all, it is recommended to bookmark matches using the "+" in the initial list and then navigate with the arrows.

At the end of the first half the system proposes, where possible, the possible final correct scores, the probabilities of signs 1, X, 2 "final time" and the possibility that there are further scores. This is a very interesting way to find good live betting opportunities
